Information concerning impacts of Corona

Dear valued business partners,

the current situation of Corona-pandemic demands a short-term and long-term rethinking of everybody in the world concerning his personal and economic circumstances — partly given exogenously by governmental formalities, partly driven by own care for staff, customers, suppliers and the business concern of the own company.

Being a manufacturer of components for i.a. medical, pharmaceutical and biotech industry we are in charge of on the one hand contributing keeping up medical facilities needed for patients suffering from low immunity, and on the other hand supporting manufacturers of active ingredients with laboratory and analysis equipment for R&D (research and development) and production.

As we consider responsibility for public welfare, we will make every effort according to the situation to keep up our company with its whole spectrum of service.

Entering our buildings and manufacturing areas by strangers or third parties is prohibited absolutely at the moment and will only be allowed to keep up manufacturing or logistics. Hence we ask you to desist from direct business visits now. We are available by phone, by eMail or by telefax as you are used to.

Sincere thanks to all persons for ensuring our health care system as well as our public life enthusiastically and professionally not only in these exceptional circumstances, but day-to-day.

We wish you, your families and your companies all the best, health, God's blessing and a wise mind to overcome this time optimistically and showing solidarity.

Stay healthy!

Fritz Althoff GmbH & Co. KG
